## **DETAILED ACTION**

### ***Response to Amendment***

In response to the amendment filed 30 October 2009 wherein applicant amends claims, 2, 10, 21 and claims 2-23 are pending in this application.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: The prior art in combination with applicant's arguments fail to disclose the claimed invention according to claims 2, 10 and 21 encrypting a server-initiated message on the network at a server with a key pair that is generated using a setup key stored both in memory associated with the server and in memory associated with a gaming machine wherein the setup key is removed from the memory associated with the gaming machine after generation of the key pair in combination with the rest of the claimed limitation. The closest prior art of Carlson, Maruyama and Raverdy (hereafter the combination) disclose a gaming server connected to a plurality of gaming machines via a network; wherein a key system is used to encrypt and decrypt information transmitted over the network. The combination fails to disclose the particulars of encrypting a server-initiated message on the network at a server with a key pair that is generated using a setup key stored both in memory associated with the server and in memory associated with a gaming machine wherein the setup key is removed from the memory associated with the gaming machine after generation of the key pair in combination with the rest of the claimed limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
